Black ops cold war warzone free

Treyarch returns to its typical form with a zombies partition in this year's Call of Duty package. Die Maschine in Call of Duty: Black Ops Cold War is a fantastic map with some nods to the past and lots of secrets to unravel your underground aether. In this guide, we will give you a primer for the most important new features presented by the map, and we will offer some tips to help you survive and pick up those expensive aster crystals. Turn on the power and pack-a-punch early (Image Credit: Activision)When you meeled your way through the first few rounds to get extra points, start opening the door and pushing into the inner sanctum Die Maschine. Follow the purple arrows on the device and the red button, only by opening the door you need to open to save money. When power is there, an anomaly should appear in the center. Go through (make sure you have 500 points) and you can follow the white crystallised walls to the Aether portal. Pay your head and you'll go down to the room with the car part. Take this to the center of the device to activate the Pack-A-Punch machine, where you can pay 5,000 points to make your weapon monster. Easy peal Use the arsenal and craft table (Video credit: Activision)When the power is there, you can also take advantage of the arsenal and craft table. The arsenal is located in the upper right corner of the inner device, from the power button. Zombies will drop to save and parts that you can save by giving yourself armor and upgrade the weapon you use for damage. It is worth a visit if you can save a few zombies at the end of each round to get some chores done. There is also a craft table, which is located in the tunnel on the way to the device. Here you can craft stim shots to keep you alive if you're corrupted, and even scorestreaks and self-revived sets at a high level. Get the right perks (Image Credit: Activision)When you have power and picked up a decent gun, head back to the big box from the way you came to get jugger-nog left. This is the most important privilege because it gives you more health to keep you alive when you are poisoned by plague zombies. Then you can pick up elemental soda from the power button room to give your gun a random shot effect. Fast resuscitation is also convenient if you're playing in a team. You can find it outside, through the Nacht der Untoten building. Beware of megaton monsters (Image Credit: Activision)Every few rounds you get a visit from plague hounds that are not too much trouble. But between the rounds of zombies and plague, you can get a visit from Megaton, an irradiated boss monster with a gigantic health bar. First of all, focus them, because they can quickly destroy your health bar with various attacks. And whatever you do, don't get close or go down. Megaton can split into two smaller radioactive zombies that deal with similar damage, so make sure they're gone when you're done turning it off. Use outdoors Less cramped zombie train if you need space. Source: ActivisionBest answer: Yes. Among the missions of Call of Duty: Black Ops for the Cold War campaign, you'll find yourself against challenging puzzles that can give you access to special side missions, arcade machines and terminals that all provide a broader context for the game's narrative series, or provide fun aside from the chaos. As well as unlocking the secret inventory, we're going to run through how you can decrypt the floppy disk and view the right suspects to complete operation red circus and Operation Chaos missions. All three of these puzzles require a decent amount of legwork, with math and critical thinking skills Fortunately, we will show you how to make each of these tasks insignificant, using evidence gathered from the main missions of the game. How to unlock inventory Call of Duty Black Ops Cold War (Image Credit: Activision)The first task you can perform when you start a campaign is unlocking inventory. When you take control of the CIA Safehouse, look around for little scrapbooks containing newspaper articles and records. You should be able to find a Dallas News article, a Warren Commission piece and clinical records. Each of these exchange boards will have two bold numbers. Pay attention to them on a piece of paper and then go to the inventory door, which remained from Lazarus and have its own clipboard. There he will tell you in what order you need to enter numbers. In our case, we had six, three from Dallas Article, 2, two from Warren and 1.1, from an autopsy report. The inventory clipboard told us that the order was Clinical, Warren and Dallas, so the final deposit was 1.1,2,2,6,3. Get inside and have fun with the arcade machine and terminal. Operation Chaos: How to decrypt the floppy disk (Video Credit: Activision)When we take every evidence from major missions using our handy evidence guide, you need to cross-reference all the evidence that you've noticed to unravel the code to decrypt the floppy disk on the evidence board. If you look at the main page of the newspaper, you will get a place name from the letters in red. Ours was New York, which matched the numbers 4.0.1.6 on the numbers station broadcast. Then you need to open the encoded message, and you will see two question marks. The red and blue numbers match the code, and you need to figure out what the answer is based on your personal message sheet. In our case, the blue numbers went up by four, 44,48,52,60,?,60, so our blue number was 56. Then we looked again at the broadcast of the number station, and Boise was marked with numbers 7.4,5,6, so I realized that the red number we needed was 74. With that we had codes 4.0,1,6,7,4,5,6, so in the first call we entered 4016, and then Boise (not 7456!), to unlock the floppy disk and achieve the mission with all the necessary information. How to view suspects and complete operation Red Circus (Video credit: activism)Once you take all the evidence of the Red Circus using our handy guide, you can now choose the option to view the suspects and find out the identity of the spies in the spy ring. What you have to do is cross-link information from the book with the remaining evidence at your disposal. In our case, we can use an example of a Bearded Lady who was sent 15k by ringleader in Austria on 1/8/81. She then took part in a vote in parliament in France 1/21/90. We noted this to one of the female operatives on the list of suspects who had appropriate dates. You are looking for dates to sort out, but you can also check the middle the nicknames of the operational staff. Watch when they say he or she wants to get the idea of spy sex if it's not clearly indicated in their code. Codename.
